

TRANSITION TEAM ■

Career Cluster Sort

CAREER EXPLORATION

HOW TO USE THIS ACTIVITY

- Cut apart the job cards or read them aloud. Students place each job under the career area they think fits best.
- After sorting, choose three jobs to research. More than one reasonable category may apply to some jobs.

Sort these jobs: nurse, welder, teacher, software developer, electrician, veterinary technician, chef, accountant, police officer, graphic designer, mechanic, sonographer, carpenter, cosmetologist, engineer, childcare worker, truck driver, dental assistant.

Discuss: Which group had the most jobs you liked? Which jobs surprised you? Pick 3 for deeper research.
